has successfully completed the online Specialization

.NET Core Mastery: Advanced Techniques for Exp Developers

This specialization is a rigorous journey encompassing 4 advanced courses. From mastering C# language intricacies to web application development with ASP.NET Core, testing, debugging, and scalable application design, you gain profound expertise. Tailored for experienced developers, the specialization empowers you to elevate your skills in modern .NET Core development. Targeted learning outcomes include advanced C# proficiency, web application development mastery, robust testing and debugging skills, and the ability to design scalable applications. Ideal for those with a strong foundation in C# and .NET development, this offers a comprehensive exploration of advanced .NET Core concepts, preparing developers for the challenges of contemporary software engineering.

Priya Pedamkar

Priya Pedamkar -
Software engineer with
MCP, MCTS in .NET

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
